Hospital Elevator

Hospital Elevator

Hospital Elevators are specially designed with features to accurately control the lift running speed with smooth and comfortable operation. Beacon optimizes the car structure and satisfies the customer demands to the maximum. It provides patient and passengers adequate space and comfort of movement, a jerk free smooth ride.

- Special customized features are added to the elevator car to meet the specific need of the handicapped patients.
- Some of the features could be Braille engravings on the button.
- Can easily carry wheel chair, stretcher & people in utmost comfort.
- Easy hand grips etc.
